BRIC-National Agri-Food and Biomanufacturing Institute (formerly National Agri-Food Biotechnology Institute & Centre of Innovative and applied Bioprocessing) is an autonomous Institute under the Department of Biotechnology, Government of India. NABI aims at catalysing the transformation of the Agri-food sector in India by being a nodal organization for knowledge generation and translational science leading to value-added products based on Agri-Food biotech innovations for improved household nutritional security. NABI is involved in research activities for Bio-fortification, the development of designer crops for improved nutrition, providing sustainable and novel solutions for quality food and nutrition, and the development of evidence-based functional foods to counter malnutrition.

The agri-food and nutritional biotechnology and biomanufacturing division at BRIC NABI requires the following personnel purely on a temporary basis under the project entitled BRIC-NABI Biomanufacturing Center “Agri-Food Bio-Mug” for a period of two years or till the completion of project whichever is earlier. The project is on setting up an integrated pilot plant facility (up to 1000 Litre processing capacity) for bioprocessing of agricultural waste biomass (lignocellulose), microbial source, and industrial waste into biochemicals and high-value commercial products (bio-

colorant, bio-pesticide, smart protein, low-calorie sweetener, enzymes, etc.). Furthermore, the biomanufacturing plant setup is a DCS/SCADA automated process system consisting of batch and/or continuous aerobic fermentation, product downstream (centrifugation, filtration, drying) and packaging operations. The process also includes the lignocellulosic biomass chemical pre-treatment and disintegration to biomass-derived biochemicals.
